
Edward C. Gallick, Ph.D.

Vice President

Dr. Gallick has over thirty-two years of experience in developing and managing complex analyses of market power, antitrust, and competition issues in regulated and unregulated industries at Federal Regulatory Agencies. Dr. Gallick's areas of expertise include development of competition analyses for market-based rate proposals in the natural gas pipeline, oil pipeline, and electric industries; merger analyses in regulated and unregulated industries; exclusive dealing arrangements, nonprice payments; and development of litigation strategy and expert economic testimony.

Before joining BWMQ, Dr. Gallick was the Manager in the Competitive Analysis Group, Office of Administrative Litigation at the Federal Energy Regulatory Commission in Washington, D.C. Dr. Gallick established precedents in litigated and nonformal proceedings on how to analyze market power issues and developed the economic framework to determine whether market power concerns exist in natural gas pipeline, crude oil pipeline, and electricity markets. Dr. Gallick planned litigation strategy in competitive analysis and market power proceedings at the Commission. Dr. Gallick reviewed, edited, and approved all testimony on all substantive issues concerning competition, market power, and efficiency for the Office of Administrative Litigation. Dr. Gallick conducted seminars on market power issues, and advised the Commission on criteria for assessing market power in geographic markets in both origin and destination markets.

Prior to his employment at BWMQ and the FERC, Dr. Gallick worked at the Federal Communications Commission and the Federal Trade Commission. He holds a BA in Economics from the California State University at San Francisco, an M.A. in Economics from UCLA and a Ph.D. in Economics from UCLA.
